

*LEYCO-DS 300 protects the skin
by preventing harmful substances
from penetrating into the skin*

LEYCO-DS 300 has been developed through close teamwork with our successful partners in the construction industry.

Profit from the positive experience of your industrial partners or your competition!

LEYCO[®]-DS 300

HAND PROTECTION

LEYCO[®]-DS 300 is a skin protection product for use in industries that are dealing with non aqueous materials. The LEYCO[®]-DS 300 is applied before the start of work to prevent the hands being effected by the handled materials.

The hands are especially protected while handling oils, fat, colours, solvents and other not aqueous materials. When working with aqueous materials, only short term protection is given, since the skin releases water, the working time is reduced considerably.

- Long lasting protection
- Neutral odour
- Contains no solvents
- Economical

LEYCO®-DS 300

- invisible
- contains no solvents
- biologically degradable
- economical
- long lasting protection
- neutral odour

LEYCO®-DS 300

Produkt-Nr. 20.039

HAND PROTECTION FOR USE WHEN DEALING WITH NON AQUEOUS MATERIALS

DESCRIPTION

LEYCO®-DS 300 is a must have product for use in various types of industry for improved health and safety.

LEYCO®-DS 300 layers help prevent aggressive materials attacking the skin, reducing the chance of skin irritations, contact eczemas and dermatitis. The contained washactive substances are biologically degradable in accordance with wash and cleaning agent law.

BENEFITS

- invisible
- contains no solvents
- biologically degradable
- economical
- long lasting protection
- neutral odour

TECHNICAL DATA

Density: 1.04 g/cm³
pH value: ca.7

COMPOSITION

Water, Sodium Cetearyl Sulfate, Sodium Lauryl Sulfate, Glycerin, Cocamide DEA, Nonoxynol 8, Parfum, Silica, Citric Acid, Titanium Dioxide, Silver Chloride, Dioctyl Sodium Sulphosuccinate.

APPLICATION

Before starting the working process, a small appropriate quantity of skin protection should be placed into the hands, rubbed in and allowed to dry up. Fingernails and nail bed should be included. After the skin protection is dried, an "invisible, dirt-deflecting glove " develops.

Where the hands are in contact with water and the protective layer dissolves itself, the hands should be washed thoroughly and a fresh layer applied. When work is completed, the hands should be thoroughly washed to remove traces of the protective layer.

STORAGE

Protect from frost. Store in a cool dry place.

PRECAUTIONS

With the appearance of this expenditure all previous technical instruction cards are invalid. Our recommendations, which we give after best knowledge and based on experiences for many years, are noncommittal and justify no contractual legal relation. The processing and quantities are to be co-ordinated with respective local conditions.

REMARK

Whilst information and/or specification contained herein is to the best of our knowledge true and accurate, and is based on many years experience, we cannot accept any liability either directly or indirectly arising from the use of our products, whether or not in accordance with any advice, specification or recommendation given by us, as we have no direct or continuous control over how or where our products are applied.

LEYDE-PRODUCTS are guaranteed against defective materials and manufacture and are sold subject to its standard terms and conditions of sale.
