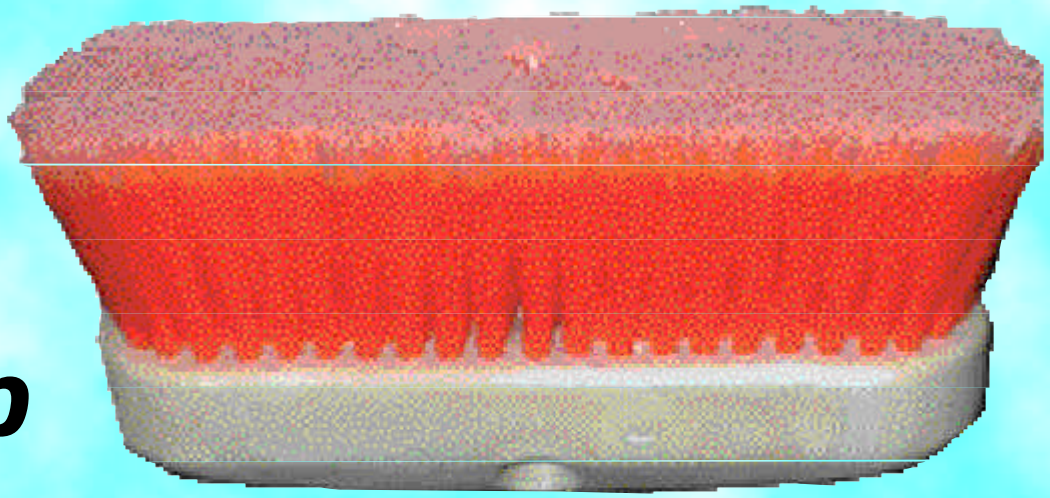
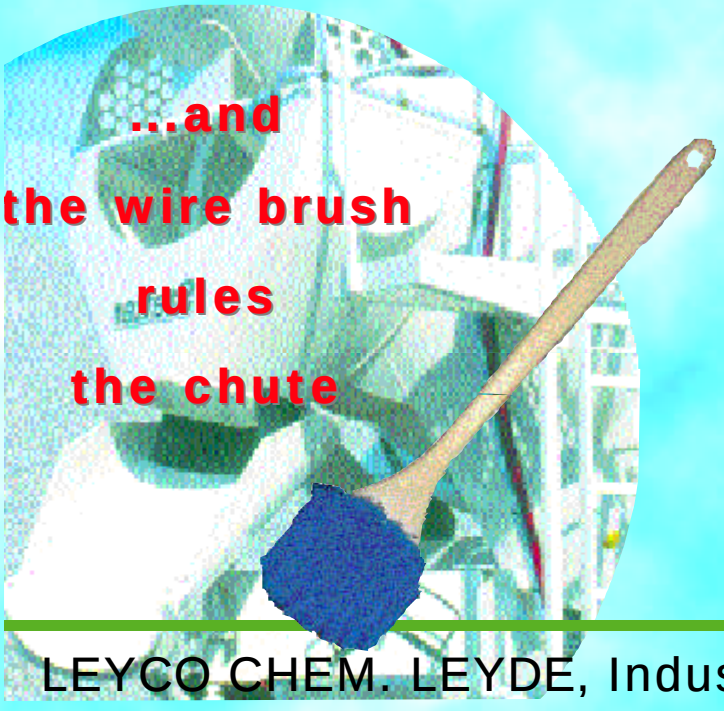
The brush that saves you money



You save up to 85% of detergent solution

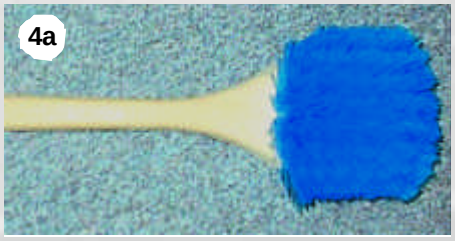


The acid-resistant brushes which have been especially designed for cleaning concrete pumps, transport vehicles for concrete and have been equipped with a detergent repository

LEYCO CHEM. LEYDE, Industriestr. 155, D-50999 Cologne

The money-spinning brush

The acid-resistant brushes have been especially designed for cleaning concrete pumps and transport vehicles for concrete and have been equipped with a detergent repository



The brushes are literally worth their money!

Experience has shown and studies have revealed that up to 85 % of all detergent solutions gets lost on the way from the bucket to the surface to which it is meant to be applied. It seaps into the ground unused.

Lets do some quick sums:
One litre of water, containing a concentration of soluble detergents, costs 0.32 Euro

The loss incurred when using a normal brush amounts to: 85 %
The loss incurred using a special brush amounts to: 25 %
The saving earned by using the special brush: 60 %

...which means the total savings per 10 litres Euro 1.92

Our test offer:

For the purchase of **285 kg ZE-KA-FIX**
or **220 kg Betonac-FIX**
we supply you with **1 brush of your choice for free!**
