

With ZE-KA-FIX, you seriously reduce cleaning time

ZE-KA-FIX has been developed through close co-operation with our business partners in the construction industry.

Join the Industry Leaders who have profited from the positive benefits of our Market Leading range of Maintenance Chemicals

ZE-KA-FIX[®]

CHLORIDE-FREE, HIGHLY CONCENTRATED CLEANER OF CEMENT AND LIMESCALE

ZE-KA-FIX is a well proven cleaning agent for all machinery associated with the concrete and cement industries.

ZE-KA-FIX is chloride-free and can be recycled around the concrete plant without any adverse effect to the following batch of concrete.

ZE-KA-FIX[®] can be used in any area where concrete is processed, whether on building sites, in readymix plants or within precast factories.

ZE-KA-FIX cleans vehicles very effectively without damaging the lacquer. This means less maintenance and repainting, and less use of harder physical and chemical cleaning methods.

- Quick and thorough cleaning of concrete on machinery and tools
- Reduces cleaning costs and cleaning time
- Does not contain hydrochloric acid
- Chloride free - has no adverse effect on the concrete and will not cause corrosion within the concrete
- Contains corrosion inhibitors
- Metal, rubber, glass and painted surfaces can be treated
- Highly biodegradable -certified by "hygiene institut Gelsenkirchen", Germany
- extremely economical - can be mixed with up to 10 parts water

ZE-KA-FIX®

- **Quick and thorough cleaning of concrete on machinery and tools**
- **Reduces cleaning costs and cleaning time**
- **Chloride free - has no adverse effect on the concrete and will not cause corrosion within the concrete**
- **Highly biodegradable - certified by "hygiene institut Gelsenkirchen", Germany**
- **Does not contain hydrochloric acid**
- **Contains corrosion inhibitors**
- **Metal, rubber, glass and painted surfaces can be treated**
- **extremely economical - can be mixed with up to 10 parts water**

ZE-KA-FIX®

Product-No 02.040

CHLORIDE-FREE, HIGHLY CONCENTRATED CEMENT AND LIMESTONE CLEANER

DESCRIPTION

ZE-KA-FIX® is a very economical product as it needs diluting with 5-10 parts water before it can be used. Dilution with less than 5 parts water is not recommended, since a stronger concentration means less cleaning efficiency.

PROCESSING

ZE-KA-FIX® is applied to the surfaces with either a brush or sprayer. Immediately the solution of ZE-KA-FIX® hits the surface, it forms a foam which attacks the cement. This foaming will slowly diminish, and so a new layer of ZE-KA-FIX® will need to be applied. This process needs repeating until the surface is cleaned. It is advisable to agitate the ZE-KA-FIX® solution with a brush whilst it is reacting on the surface.

ZE-KA-FIX® can be applied to most surfaces, metal, good enamel, wood, rubber and glass are not damaged.

ZE-KA-FIX® contains no hydrochloric acid and inhibits the corrosion!

ZE-KA-FIX® is not poisonous and can be let into the drains once it has been highly diluted.

TECHNICAL DATA

Color: green
Form: liquid
Spec weight: approx. 1,48
pH value: 1,15

PRECAUTION

Wear suitable PPE whilst applying ZE-KA-FIX®. Wash splashes off skin with plenty of clean water. Wash splashes from eyes with copious amounts of clean water. Always refer to the safety data sheet.

REMARK
